Magna International Pte Ltd (Job No : 10032118/05)

Introduction

The purpose of the test is to ascertain the efficiency of Magna Legionella-X 100 (Air Sterilizer) in removing the bacteria in water and an enclosed environment.

A comparative study of the air quality of a room measuring 4m X 4.5m X 3m located in SGS Singapore was carried out on 04th August 2005.

See attached analysis reports for results.

All orders are accepted and all services are rendered subject to the General Conditions of Service printed overleaf. Attention is drawn to the limitations of liability indemnification and jurisdictional issues defined therein. Except by special arrangement, the test items, will not be retained by the Company for more than three months. The results shown in this test report refer only to the sample(s) tested unless otherwise stated. The test report cannot be reproduced, except in full, without prior written permission of the Company.

Magna International Pte Ltd (Job No : 10032118/05)

Conclusion

By comparing results before and after activation of Magna Legionella-X 100, the following findings were observed :

a) Air

Approximately 47% reduction in total bacterial count after activation of Magna Legionella-X 100 for 5 hr.

SGS TESTING & CONTROL SERVICES SINGAPORE PTE LTD

ADRIAN NG
OPERATIONS EXECUTIVE

All orders are accepted and all services are rendered subject to the General Conditions of Service printed overleaf. Attention is drawn to the limitations of liability indemnification and jurisdictional issues defined therein. Except by special arrangement, the test items, will not be retained by the Company for more than three months. The results shown in this test report refer only to the sample(s) tested unless otherwise stated. The test report cannot be reproduced, except in full, without prior written permission of the Company.

Analysis Report of Magna Legionella-X 100 for Indoor Air

Time Of Sterilization	Total Bacterial Count, Cfu/m ³ (TSA, 35°C 48 Hrs)	Method
Before Sterilization	17	Biotest RCS Centrifugal Air Sampler Brochure
After 5 hrs	9	Biotest RCS Centrifugal Air Sampler Brochure

Note: Magna Legionella-X 100 was switched on for only 5 hr before inspection of the agar strip.

Remarks : From the results obtained, it is believed that the total bacterial count would have been further reduced if the tests had continued.

All orders are accepted and all services are rendered subject to the General Conditions of Service printed overleaf. Attention is drawn to the limitations of liability indemnification and jurisdictional issues defined therein. Except by special arrangement, the test items, will not be retained by the Company for more than three months. The results shown in this test report refer only to the sample(s) tested unless otherwise stated. The test report cannot be reproduced, except in full, without prior written permission of the Company.
